

Explora BioLabs provides custom-tailored discovery pharmacology services focusing on PK, non-GLP toxicology, oncology, infectious and metabolic diseases, wound healing and novel model development. The company delivers professionally-managed, cost-effective, premium outsourced vivarium services, enabling pharma, biotech and leading academic researchers to accelerate their preclinical programs by virtualizing their pharmacology infrastructure.

***In vivo* contract research services**

Explora BioLabs provides customized preclinical pharmacology and consulting services to accelerate the development of your drugs and devices.

Our experienced scientific team can assist you by selecting appropriate animal models, designing interpretable experiments, and conducting high-quality *in vivo* studies.

We understand the importance of open scientist-to-scientist communication, meeting project timelines, and maintaining control over your budget.

Explora's research expertise includes:

- Oncology models
- Diabetes/obesity models
- Immunotherapy studies
- Dermal wound healing models
- Bacterial and viral infection studies
- Surgery models
- Tissue and primary cell isolation
- Pharmacokinetic studies
- Non-GLP toxicity studies
- Customized model development
- Histology, serum chemistry, hematology and cell culture support

Professionally managed rental vivarium

Explora's 33,000 square foot, AAALAC accredited rental vivaria are located in San Diego, CA, near the Torrey Pines and Sorrento Valley biotech communities. Exclusive-use vivarium rooms of various sizes are available to house your experimental subjects for short term or long term projects.

Explora's vivarium rooms are equipped with customized, state-of-the-art rodent and non-rodent caging systems and staffed by professionally trained personnel.

Features of Explora's rental vivarium include:

- AAALAC accreditation
- NIH assurance
- USDA licensed
- State radiation license
- IACUC review provided
- Experienced attending veterinarian
- HEPA-filtered, individually ventilated, disposable/recyclable rodent cages
- Biosafety Level II labs
- Available technical support from our research scientists
- Cell culture and molecular biology labs
